

Switches are first set to 8'b 0000 0000

Switches are set to 8'b 1111 1001
(-7 in decimal)

Switches are set to 8'b 0011 1011
(59 in decimal)

First Half of the final result stored in register A
8'hFE = 8'b 1111 1110

Reset is set to 1 to clear all the registers: register X, register A, and register B since it's an active-high signal
